

An alternative to costly sound rooms, now you can enhance testing capabilities with the Sound Control Booth, or SCB, and provide a more comfortable, claustrophobia free, patient environment. Easy access or egress for your elderly or handicapped patients.

The SCB is the ideal sound booth for any hearing instrument or audiology practice. It is both economical and space saving. It is delivered completely assembled and ready to use.

The SCB features furniture grade construction and a well lit, custom upholstered interior that creates an open feeling, encourages interaction and improves the testing environment.
