TEXT

Theoretical Physics and some crucial experiments

Classical physics

Aether http://en.wikipedia.org/wiki/Classical_element
four types of causes http://en.wikipedia.org/wiki/Four_causes

Newtonian Mechanics

laws of motion http://en.wikipedia.org/wiki/Newton's_laws_of_motion
Neptune http://en.wikipedia.org/wiki/Discovery_of_Neptune

Particles in space and time

inertial frames http://en.wikipedia.org/wiki/Inertial_frame_of_reference

Waves

waves <http://www.acs.psu.edu/drussell/Demos/waves/wavemotion.html>
the surface is still all the time even if two waves pass the spot
http://en.wikipedia.org/wiki/Huygens-Fresnel_principle

Dr Quantum <http://www.youtube.com/watch?v=DfPeprQ7oGc>

What is light?

During the Greek time the focus was to explain sight. Some as the Pythagoreans thought that the eye sent out an invisible fire and Euclid talked about rays of sight but not rays of light. Alhazen¹ (965-1040) talked about light rays and gave the base for geometrical optics developed by Kepler¹ (1571- 1630) which strengthened the view that light was a physical phenomenon: outside ourselves there is something which propagate in straight lines, is reflected, is diffracted and gives rise to pictures when passing a lens. This ‘something’ we call light, but what is its nature?

Alhazen http://www.visionlearning.com/library/module_viewer.php?mid=170
Kepler <http://plato.stanford.edu/entries/kepler/#OptMetLig>
Huygens http://en.wikipedia.org/wiki/Huygens-Fresnel_principle
“Newton’s rings” http://en.wikipedia.org/wiki/Newton's_rings

Young http://en.wikipedia.org/wiki/Young's_interference_experiment

Electricity and magnetism

These phenomena were, as far as I know, in a scientific meaning seen as separate.

thunderbolt was of electrical nature

http://en.wikipedia.org/wiki/Benjamin_Franklin#Electricity
<http://www.mos.org/sln/toe/kite.html>

Galvani http://en.wikipedia.org/wiki/Luigi_Galvani

Volta's pile http://en.wikipedia.org/wiki/Alessandro_Volta#Volta_and_Galvani

Oersted

<http://www.youtube.com/watch?v=BM4m2GId3F8&feature=related> Some say it was discovered 1802. http://en.wikipedia.org/wiki/Gian_Domenico_Romagnosi

<http://physicsworld.com/cws/article/indepth/2013/nov/28/a-romantic-scientist>

A review of a book about H.C.Oersted saying that french scientist didn't expect e connection between electricity and magenetsim but that Oersted did.

Faraday http://en.wikipedia.org/wiki/Michael_Faraday

magnetic force could give electrical current Suggested the year before according to http://en.wikipedia.org/wiki/Francesco_Zantedeschi

This is the base for how we produce electricity in power plants using water , carbon , oil or nuclear energy to drive turbines. Se also another way **bränsle celler, solarpower**

James Clark Maxwell http://en.wikipedia.org/wiki/James_Clerk_Maxwell

Maxwell's equations ∇ concerns partial differentiating on x, y, z : $\frac{\partial}{\partial x}, \frac{\partial}{\partial y}, \frac{\partial}{\partial z}$ see

http://en.wikipedia.org/wiki/Maxwell's_equations

Velocity of light <http://www.speed-light.info/measurement.htm>

http://en.wikipedia.org/wiki/Fizeau_experiment

http://en.wikipedia.org/wiki/Fizeau-Foucault_apparatus

electromagnetic waves http://en.wikipedia.org/wiki/Electromagnetic_spectrum

Michelson and Morely experimentally <http://www.aip.de/pr/Michelson.e.html>

Lorentz theory http://en.wikipedia.org/wiki/Lorentz_ether_theory

Poincaré http://en.wikipedia.org/wiki/Henri_Poincaré

Unsolved problems in classical physics

Atoms <http://plato.stanford.edu/entries/atomism-modern/>
