

The RetroBro Quick Guide

www.retrobrogaming.com to download digital guide

Powering on the console for the first time.

1. Insert hdmi cable into hdmi slot. Plug hdmi into tv
2. Insert the controller into one of the four USB slots
3. Plug in the power supply to any household outlet, then connect micro usb power in o the back of the console (this must be done after connecting hdmi or you will not see a picture)
4. After bootup you will be prompted to pair the controller. Hold down any button and click the corresponding buttons when asked (ie press up for up, and a for a etc) if no button matches IE right analog just hold down any button to skip.
5. Now you are ready to play.

Power Off the console

1. Press start
2. Select system shutdown

Adding Roms onto The RetroBro VIA formatted (blank) USB flash drive.

1. Plug a formatted (blank) usb drive into a pc and create a folder called retropie (no caps no spaces) on the usb drive.
2. Safely eject the usb from your pc.
3. With your RetroBro unplugged, plug in the usb drive and bootup the RetroBro console. (the RetroBro will create files in the "retropie" folder you created)
4. Once console is booted up shut down the console and remove the USB drive.
5. Plug the USB drive back into your pc and you will now see a roms folder within the retropie folder you created.
6. Drag and drop your roms into the corresponding folder IE Sonic in the genesis roms folder and super Mario 3 in the NES roms folder.
7. Once all of the roms you want to move are in the correct folders safely eject the USB flash drive.
8. Repeat step 3. Now when the console launches you will see different options for gaming systems to select along with the roms you added. Note: depending on the amount of roms you added this may take a few minutes.
9. It is now safe to remove the USB drive.

Adding roms onto The RetroBro VIA home network

1. Launch console and plug into your home network via wifi or Ethernet wire (Ethernet recommended).
2. From a windows PC go to my computer and click on network (if using windows xp you will select "my network places").
3. Select "retropie". (if using XP you will see "roms on samba" in the my network places folder)
4. You will now see a roms folder.
5. Place your roms into the corresponding folder.
6. Now from your retro pie you will click start on your controller and elect restart system. No you will see the roms in the corresponding folders.
