

Name _____ Date _____ Class _____

9th Grade Science Choice

Please select which class is your first choice for science next year.

LIVING ENVIRONMENT: REGENTS BIOLOGY 1 year, 1 credit Grades 9-12

Prerequisite: None Weight: 1.08 Required

Labs: Included in 7.5-period-per-week course

This course is based on the New York State Living Environment Core Curriculum. Teachers provide instruction in all required areas and selected optional areas of the program. Students are required to take the New York State Regents Examination. This class is very similar to the Life Science class you took in 7th grade.

PHYSICAL SETTING: REGENTS EARTH SCIENCE 1 year, 1 credit Grades 9-12

Prerequisite: None Weight: 1.08 Required

Labs: Included in 7.5-period-per-week course

This course is based on the New York State Earth Science Core Curriculum. Students are required to take the New York State Regents Examination. This class will cover some more topics like those covered in 6th and 8th grade. These topics include; Rocks, Minerals, Landforms, Weather, Planets and the Solar System.

This is the first step in the process of scheduling (science) for next year. I will share these choices with guidance and **provide my own recommendations**. Guidance will make the best selections based on this information. PLEASE talk to your counselor about your interests and make sure you take the classes they YOU want to take.
