GYN  
Colposcopy Ambulatory Progress Summary

Goesseringer, Sonja Gabriele  
MRN: 117-3167  
D.O.B. May-20-1954

August 21, 2017

Sonja has a very atrophic vagina and a stenotic cervix. She is using Vagifem successfully. She is not sexually active.

Colposcopic examination showed an atrophic vulva. The vagina had adequate lubrication, but was very tightened, constricted from lack of coitus.

Using a small instrument, I was able to isolate the cervix. The cervical os was markedly stenotic.

I did an endocervical and transformational Pap smear. If everything is okay, I have suggested that she see you about referring back to me in 3 years' time.
